To Whom it may concern,

The purpose of this letter is to recommend Back To Health In-Home Rehabilitation to you.

Back To Health In-Home Rehabilitation has provided physical therapy services for many of my patients and I have been extremely pleased with every aspect of their care. Their therapists are not only very competent but are very personable as well.

My patients have been very happy with Back To Health's care , and they have thanked me for recommending this avenue of physical therapy treatment for them. Since the patients are seen in the comfort of their own home and are seen by the same therapist throughout their course of treatment, patients almost always complete their course of physical therapy and often see better results than in traditional physical therapy clinics.

Back To Health In-Home Rehab accepts Medicare and other insurance reimbursement. All patients that would normally receive physical therapy are eligible for treatment, with the exception of Medicare patients that are actively receiving care from a Home Health Care agency.

I have found Back To Health In-Home Rehab's services extremely helpful to my patients. It is my pleasure to recommend them to you without hesitation.

Sincerely,

Samuel H. Friedman, MD
